- VCube 7.0 is supported under Windows 7 (64bit) and Windows 10 (64bit)
- VCube Known issues: <https://confluence.merging.com/display/PUBLICDOC/VCube+v7>

Blackmagic design Video Cards Support Configuration:

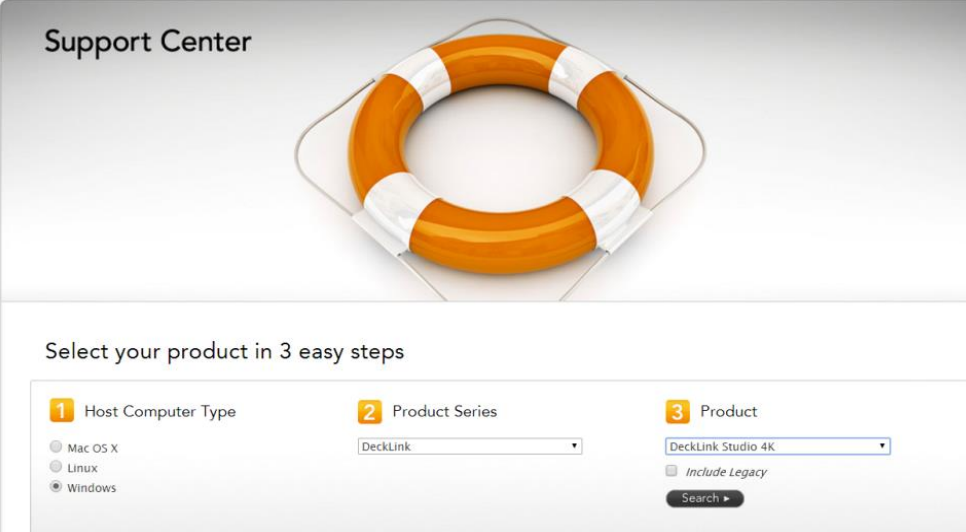

As of VCube 5.1, Merging now supports Blackmagic design Video Cards thru the DeckLink SDK. This covers DeckLink, UltraStudio and Intensity product lines. Decklink Studio 4K, Decklink 4K Extreme and Decklink 4K Pro have been validated. The DeckLink Studio monitor is known to working but has no Video reference to ensure genlock.

Note: The Decklink 8K Extreme Pro is not supported above 4K DCI / 25 fps

Blackmagic design installer recommended versions is 10.9.1
(Known issue is that the Settings panel must be opened under Windows)

Installation/Setup:

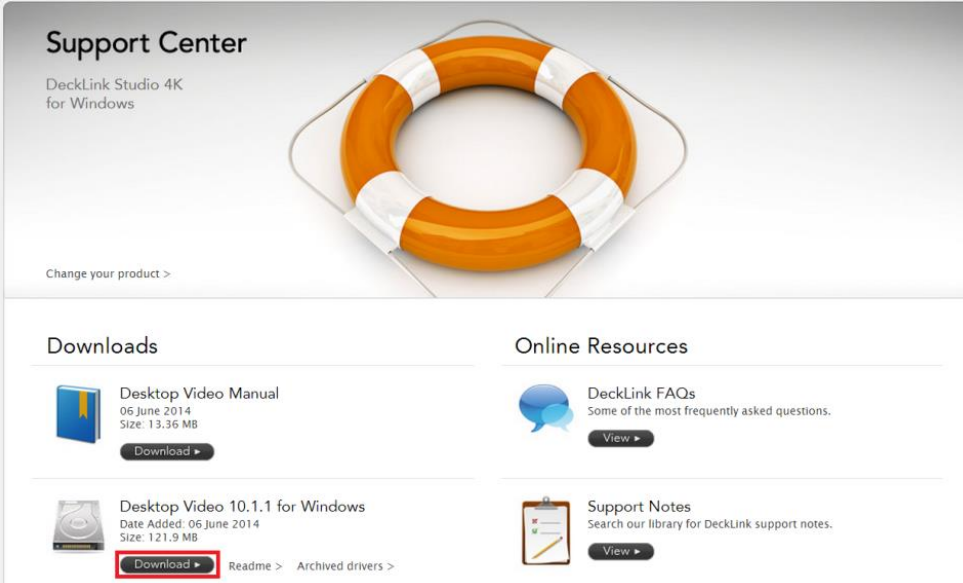

1. Go to <http://www.blackmagicdesign.com/support>
2. Follow the 3 easy steps to select a product (in this example, DeckLink Studio 4K on Windows)

The screenshot shows the 'Support Center' page with a large orange and white lifebuoy graphic. Below the graphic, the text reads 'Select your product in 3 easy steps'. The interface is divided into three columns:

- 1 Host Computer Type:** Radio buttons for Mac OS X, Linux, and Windows (selected).
- 2 Product Series:** A dropdown menu with 'DeckLink' selected.
- 3 Product:** A dropdown menu with 'DeckLink Studio 4K' selected, an 'Include Legacy' checkbox, and a 'Search' button.

3. Download the Desktop Video package.

The screenshot shows the 'Support Center' page for 'DeckLink Studio 4K for Windows'. It features the same lifebuoy graphic and a 'Change your product >' link. Below the graphic, there are two main sections:

- Downloads:** A list of two items:
 - 'Desktop Video Manual' (06 June 2014, 13.36 MB) with a 'Download' button.
 - 'Desktop Video 10.1.1 for Windows' (Date Added: 06 June 2014, Size: 121.9 MB) with a 'Download' button (highlighted with a red box), 'Readme >', and 'Archived drivers >' links.
- Online Resources:** A list of two items:
 - 'DeckLink FAQs' (Some of the most frequently asked questions.) with a 'View' button.
 - 'Support Notes' (Search our library for DeckLink support notes.) with a 'View' button.

4. Register and Download your Software:

Note: you don't have to register to download the Desktop Video package. Just press "**Download now**" to get the package download started.

The form is titled "Register and Download your Software" and is divided into two main sections: "Product Information" and "Owner Information".

Product Information:

- Product model: DeckLink Studio 4K
- Host Computer Type: Radio buttons for Windows XP, Windows Vista, and Windows 7.
- Serial: A text input field with a "Find serial number >" link next to it.
- How do you use this product?: A large text area.
- What features should we urgently add?: A large text area.

Owner Information:

- First Name: Text input field.
- Last Name: Text input field.
- Company: Text input field.
- Email: Text input field with placeholder "youremail@domain.com".
- Phone Number: Text input field.
- Country: Dropdown menu with "United States" selected.
- City: Text input field.
- State: Text input field.

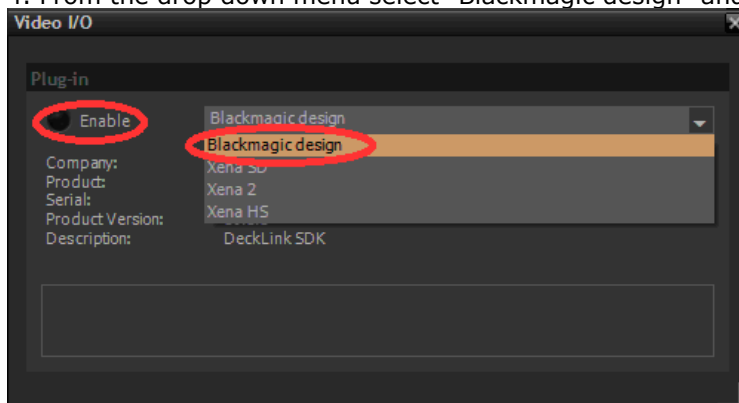

At the bottom, there are two buttons: "Register & Download" and "Download Now". The "Download Now" button is highlighted with a red box.

5. Once downloaded, un-zip the package.
6. Run the DesktopVideo_x.x.x.msi installer and follow the specific instructions.
7. Restart your system once the installation is completed.

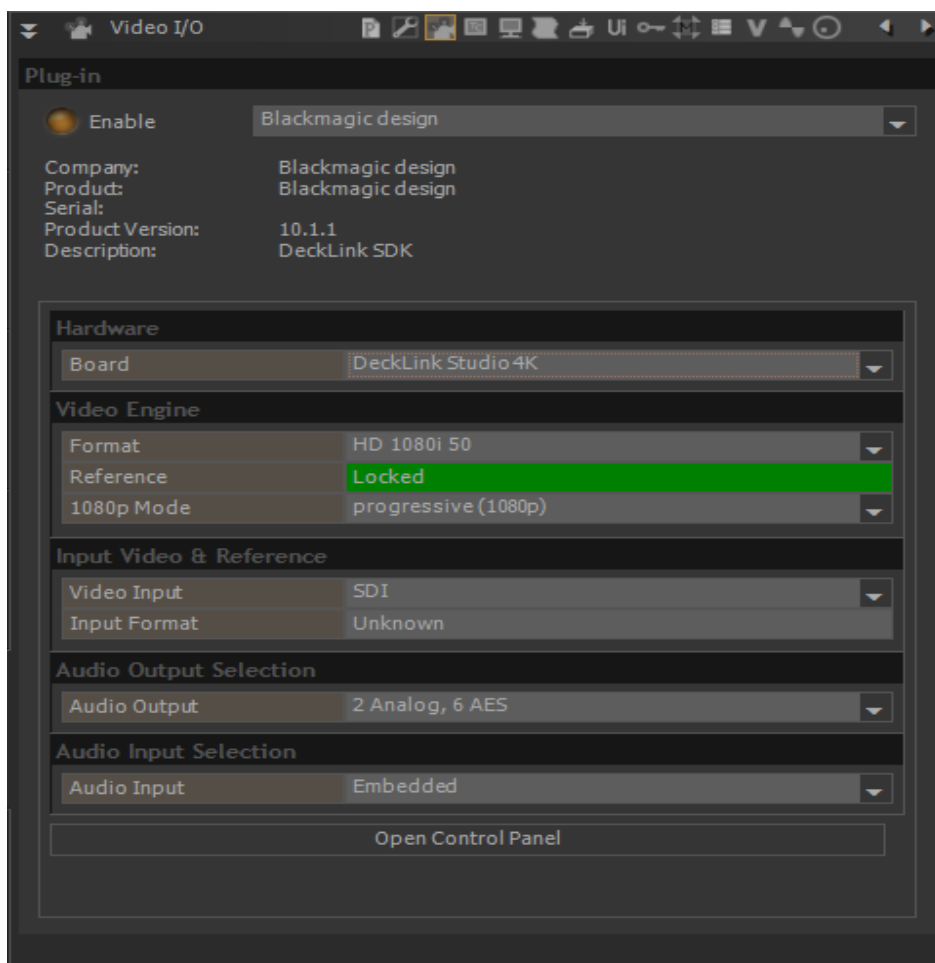

Behavior description

Enable Blackmagic design video I/O in VCube.

1. Start VCube.
2. Prompt the Video I/O setting tab (SHIFT-ALT-P).
4. From the drop down menu select "Blackmagic design" and enable the card

The Video I/O Plug-in tab gets populated. Depending on options and card properties, you'll get access to the following options:

Hardware

If several Blackmagic design cards are installed, you can select the one you control from the Board dropdown.

Video Engine

Format: Choose video format / resolution. HD formats will require the proper keys.

Reference: Indicator of the video reference. Note: Some cards might not support this

1080p mode: Segmented frame mode; Progressive or segmented (for VTR supporting Interleave).

Note: We recommend users to use the VCube quick SD (ALT+F5) and quick HD settings (ALT+F6) in order to automatically configure the format and 1080p mode.

Input Video & Reference

Video Input: Only valid for some Blackmagic cards supporting input. Note that this option is only available for VCube SE users. Allows users to select video input source (connector); Choices can vary from; SDI, HDMI, Component, Composite, S-Video

Input Format: Only available on some Blackmagic cards. Indicates the input video format. Only active when in record Mode.

Audio Output Selection

Audio Output: Choice can vary with different Blackmagic cards. Users must select their audio output source. Available possible physical output choices (example: DeckLink-Studio); 4 analog, 2AES or 2 Audio, 6AES

Audio Input Selection

Audio Input: Choice can vary with different Blackmagic cards. Users must select their audio input source. Available possible physical input choices (example: DeckLink-Studio); Embedded, AES/EBU, Analog.

Open Control Panel:

Will open the Blackmagic Design control panel
